

Protect yourself

from

Fraud & Scams

What are scammers after?

Personal information

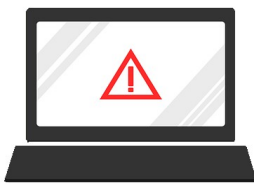

This allows them to access your money

Money

How do they get your data?

Stolen

This is where someone hacks your device or breaches rules on information

Unintentional

This is where you click on a link believing it to be safe

Willingly but unintentional

This is where you post private information on social media or 'like' sites that allow access to your personal information

How to protect yourself?

Use a **strong password** with added **numbers** and **symbols** such as **carO!?*&**

If you get a telephone call from someone you don't know
hang up

Think twice before you give any information away

Protect your devices by antivirus and updates
